ABOUT ME

I am a First-Class Honors Electrical and Electronics Engineering graduate with a strong academic, professional and technical background. I enjoy hard work, solving problems and creating future strategies. I am Hardworking, energetic, analytical and a great problem solver with proven ability of managing varied tasks effectively whilst maintaining a consistently high standard of work under pressure. In addition, I am a strong team-player who enjoys working with others on different projects in order to see things through completion and achieve positive holistic development of an institution in this dynamic world.

Kenyan

WORK EXPERIENCE

Regional ICT Competition Project Lead- Sub-Saharan Africa
Huawei Technologies/Jun 2021 – Feb 2026

- Spearheading the planning, execution and monitoring of the Huawei ICT Competition project in 20+ countries across Southern Africa Region like Kenya, South Africa, Nigeria, Ghana, Angola, Mozambique, Mauritius etc; ensuring alignment with Huawei's global ICT talent development goals.
- Leading cross-country teams of students, trainers, mentors, and university partners to Shenzhen, China every year to participate in the annual Global finals of ICT Competition in networking, cloud computing, and AI tracks.
- Designing and delivering technical training programs (in networking, cloud computing and Big Data) and AI Hackathons to prepare Africa students for regional and global competition stages.
- Mentoring 100+ students and faculty members from Southern African universities every year, improving their technical proficiency in Huawei's tech ecosystem.
- Collaborating with stakeholders like Huawei regional offices, universities, and government bodies and ministries of education to expand the competition participation and sponsorship opportunities.

Technical intern
Kenya Power and Lighting Company/May 2021 – June 2021

- General maintenance and troubleshooting of utility and substation transformers, on both low voltage side and high voltage side.
- Maintenance of Remote Tap Changer Control panel (RTCC) and its components which include relays, PLC systems, circuit breakers, voltmeters and ammeters.
- Commissioning and installation of 11Kv circuit breakers in substations.
- Testing current and voltage transformers.
- Meter reading and commissioning of three phase meters.
- Remote monitoring and control of transformers in substations using SCADA technology.
- Taking inventory of electrical equipment in substations.

EDUCATION

Masters of Science in Information Technology Project Management
Saint Louis University/ Mar 2026- Dec 2027
Saint Louis, United States
